Land and Human to Advocate Progress
CSO/ Jordan

By Amer Tubeishat

World Water Week in Stockholm, 28 August – 2 September, 2016
LHAP in a nutshell

• LHAP is a civil society organization based in Amman-Jordan
  • We started our activities in the year 2000
  • We have about 60-100 active volunteers and about 7 staff members
  • Our level of activity is at many levels including local and national
LHAP in pictures
Themes

• LHAP is widely involved in:
  • Mobilizing and addressing youth and women
  • Civic education and political participation
  • Conserving and protecting natural resources
  • Focus on water being a national priority scarce resource
  • Improve economic and social situation in Rural and Bedouin communities
  • Assist communities to understand local issues, determine the priorities and constraints of work, and to find appropriate solutions.
LHAP and Water issues, I

• Water Journalism Kit: LHAP produced 32 pages Water Journalism Kit tailored to public relation officers in the NGO’s functioning in the Mediterranean.

• The Kit was printed in English and circulated to members of MIO-ECSDE Network of NGO’s in the Mediterranean.
LHAP and Water issues, II

• Traditional Water Harvesting Systems to Improve community resilience to climate change, a project funded by Coca Cola initiative through the UNDP office.

• A program to build capacity of industry associations, media rights defenders about water rights

• A Project to rehabilitate several traditional water ponds from ancient Roman and Byzantine times. Properly restored, used again for their original purpose, to improve community resilience for water scarcity and consequences of climate change.
WATER SUM project and WGS has a great potential to support LHAP and other local CBOs in Jordan in the theme of Environmental Resources Conservation and Water in particular through:

• Providing proper platforms to network and share experiences with other local NGOs in the region and the world through the CSOs Forum in WGSI.
• Provide scientific resources that can support projects methodologies and implementation like studies, manuals or so.
• Provide capacity building opportunities for environmental CSOs activists to attend trainings and workshops.
LHAP vs. WATER SUM project and WGS Initiative, II

• Providing medium for LHAP to interact with local authorities in Jordan like MWI, municipalities and more to strengthen cooperation and synergies.

• Providing opportunities to improve the policies of water governance and management through cooperation with international and regional institutes.
