HIP-Petrohemija is the largest producer of petrochemicals in the Republic of Serbia, with a tradition that covers almost three decades. The company’s manufacturing facilities occupy the industrial zone of Pančevo, Elemir, which lies near Zrenjanin and Crepaja.

**Activities**

We produce nearly 700,000 tonnes of petrochemicals. In addition to manufacturing HIPLEX®, HIPTEN® and HIPREN® polymers and PE pipes, we also produce:

- ethylene
- propylene
- pyrolysis gasoline
- pyrolysis oil
- C4-fraction
- chloralkali electrolysis products
- 1,3-butadiene
- methyl tertiary butyl ether

**Environment**

HIP-Petrohemija is committed to supporting sustainable development through systematic environmental management. Activities practiced in order to monitor and control the impact on environmental quality are aimed at:

- monitoring air emissions
- wastewater and groundwater quality control
- waste management
- chemical management

**Reporting**

We report to the Serbian Environmental Protection Agency with regard to:

- general information about pollution sources
- emissions to air
- emissions to water
- waste management, specific waste streams and management of packaging and packaging waste.

Now, through the EMC project, we are using the TEAMS* system for reporting.

---

* The EMC Centre provides its client-partners with the use of TEAMS SR software, an environmental accounting and reporting system in accordance with the PRTR Protocol and national legislation of the Republic of Serbia in this area.
