Serbian Railways JSC is a transport company whose main activity is the transportation of passengers and freight.

**Activities**

The company’s main activities are:

- organisation and control of rail transport (passengers and freight)
- maintenance of rolling stock and railway infrastructure
- modernisation and protection of rolling stock and railway infrastructure
- monitoring of the construction and reconstruction of railway infrastructure
- assembly of devices, plants and installations

**Environment**

As one of the most efficient and environmentally friendly ways to move people and goods, railways have a tremendous potential to reduce the environmental impact of transport and improve the quality of life of citizens. Acting on this potential, Serbian Railways founded its Center for Sustainable Development on September 1, 2010. The Center focuses its activities on promoting railways as an energy efficient and environmentally friendly entity.

**Reporting**

As a waste generator and proprietor, Serbian Railways is obliged to maintain and keep records on waste and to submit annual reports to the Serbian Environmental Protection Agency. After joining the EMC project, Serbian Railways acquired a powerful tool for reporting, **TEAMS***, which is used successfully. The company now possesses a uniform platform for distributing information to relevant national and international organisations, such as SEPA and the EBRD.

---

* The EMC Centre provides its client-partners with the use of **TEAMS** SR software, an environmental accounting and reporting system in accordance with the PRTR Protocol and national legislation of the Republic of Serbia in this area.
