**Improving Access to Green Funding in Central and Eastern Europe (CEE) and Ukraine**

The project aimed to improve access to green funding in CEE and Ukraine by raising awareness and providing a forum for knowledge exchange.

- **Duration:** 2011–2014
- **Donor:** European Commission, ESPON 2013 Programme
- **Budget:** EUR 750,000 (REC share EUR 97,000)

**IN NUMBERS:**
- 271 regions
- 9 sector studies
- 10 case studies

**Activities**
- Analysing the availability of green financing in CEE and Ukraine
- Identifying bottlenecks
- Identifying good practice examples
- Facilitating the dissemination of expertise, experience and best practices by creating a platform for the exchange of knowledge

**Impacts**
- Profiles developed for 11 countries, providing an overview of green financing, including sources of funding for green investments and an assessment of the potential for sustainable growth
- A regional workshop on financing eco-innovations organised in CEE
- A national workshop on streamlining investments in the waste sector organised in Ukraine
- A set of recommendations for policy makers compiled and disseminated

**GEOGRAPHICAL SCOPE**
Bulgaria, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Romania, Slovakia, Slovenia, Ukraine

**GREECO — Assessing Territorial Potential for a Green Economy in European Regions**

The project identified green economy performance and mapped opportunities for the transition to a green(er) economy in European regions.

- **Duration:** 2013–2014
- **Donor:** Ministry of Infrastructure and the Environment, the Netherlands
- **Budget:** EUR 60,000

**IN NUMBERS:**
- 11 in-depth country profiles
- 2 workshops
- 2 studies on green financing (CEE and Ukraine)

**Activities**
- Assessing the territorial dimensions of and potential for green economy
- Drafting green economy sector studies
- Drawing up regional case studies
- Undertaking policy analyses to identify key territorial policy areas contributing to green economy

**Impacts**
- Territorial evidence produced, relevant to the EU Cohesion Policy and its programming process
- New indicators developed for assessing regional compliance with Europe 2020 objectives
- Regional green economic performance index created
- Drivers of and barriers to green growth defined
- Policy messages and recommendations delivered to different territory types

**GEOGRAPHICAL SCOPE**
EU27, Iceland, Liechtenstein, Norway, Switzerland
