Living Laboratories: Resilience and Sustainability of Municipalities

The goal of the Living Laboratories course is to build capacities for resilience and sustainability at local governance level through small-scale actions.

**Activities**
- Holding a preparatory capacity-building workshop for experts from the organising partner institutions
- Forming local teams based on the Sustainable Development Academy’s alumni network
- Organising a two-week course for participants from Central and Eastern Europe on developing sustainability and resilience know-how
- Identifying sub-national responses to large-scale economic and resource-related challenges
- Supporting the development of local projects aimed at nurturing sustainability and the resilience of social and ecological systems

**Impacts**
- Further contribution to knowledge sharing between the REC, Venice International University and other partners
- Updated and upgraded course content and methods
- Practical assistance in bringing about change in the region

**IN NUMBERS:**
- Duration: 2008–2011
- Donor: Italian Ministry for the Environment, Land and Sea
- Budget: EUR 717,078

**GEOGRAPHICAL SCOPE**
Albania, Bosnia and Herzegovina, Croatia, Hungary, Kosovo*, Former Yugoslav Republic of Macedonia, Montenegro, Poland, Serbia, Turkey

*The designation is without prejudice to positions on status, and is in line with UNSCR 1244 and the ICJ Opinion on the Kosovo declaration of independence*

Course for Sustainability for Black Sea Countries

**Activities**
- Analysing regional problems and identifying the best practical solutions through case studies drawn from the region and EU member states
- Sharing in-depth knowledge of global and regional sustainability issues and their practical context
- Providing theoretical and practical information on policies and instruments related to sustainable development
- Encouraging the application of acquired knowledge in participants’ institutions

**Impacts**
- Regional network created for joint activities
- Greater understanding of the importance of partnerships in achieving sustainable development goals
- Participants equipped with tools to integrate sustainable development components into decision-making processes

**IN NUMBERS:**
- Duration: 2012
- Donor: Italian Ministry for the Environment, Land and Sea
- Budget: EUR 180,000

**GEOGRAPHICAL SCOPE**
Bulgaria, Georgia, Romania, Russian Federation, Turkey, Ukraine
